Talkook Stud was established in 1968 by Robert 'Bob' Anderson for the purpose of meeting the high demand for 1st cross ewe clients as well as the production & stocking purposes for Bob's family, trading as Mt Pleasant Pastoral Company in the Crookwell area. In the initial years the Stud was based on Yarra bloodlines. Over the last 52 years, Bob has carefully selected Rams into the stud for the purpose of both wool and meat quality. These sires have been selected from studs such as The Oaks, Raywil, & Chain O Ponds, with the introduction of sires more recently in the last 15 years from the Cadell and Retallack studs.

Talkook Stud has been & remains dedicated to its clients in producing high quality carcass traits within its sires as well as quality wool.

StockScan is the only performance recording system delivering **processed data** on eye-muscle width, depth and area measurements, providing definitive results to achieve:

- MORE MEAT
- HIGHER YIELD CARCASSES

An on-farm tool used by Stud & Commercial Breeders. Run by dedicated breeders who understand the Prime Lamb Industry.

EXPLANATION:

EMW-Eye Muscle Width (A), EMD-Eye Muscle Depth (B) and YCF-Fat measurement (C), which allows us to calculate the Eye Muscle Area (EMA). Eye Muscle Area (EMA) to weight (LW) ratio is also calculated.
